

B-TRONIC

smart

BECKER
Together it's easier.

”Is there actually a **home automation** system that can really meet all our requirements?”

A world first: B-TRONIC!

The complete radio-based home automation system.

” And how does
B-TRONIC?
work? “

Roller
shutters

Heater

Radio

Webcam

The B-TRONIC system: wireless freedom and independence.

Switchable
sockets

Garage doors

Sun
protection

CentralControl:
The main radio control unit
of the B-TRONIC system with
status display

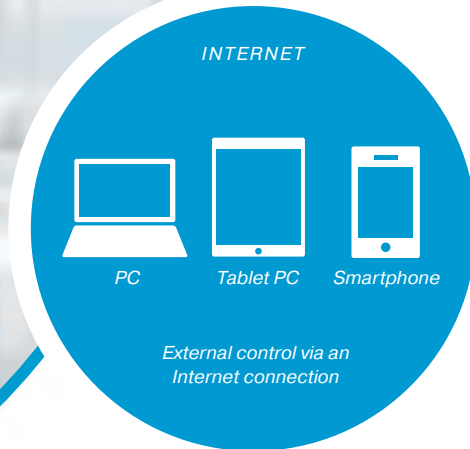

Lighting

Alarm system

Can be
enhanced with
KNX
products ...

Future-proof due to KNX standard:

KNX is widely used and recognized as the international standard in home automation systems. The products of various manufacturers can be combined; the KNX logo ensures networking.

B-TRONIC is a bi-directional control system. What does it mean?

The controlled devices send feedback about their status to the CentralControl. You are able to monitor the current position of roller shutters, radiator valves, sun protection systems, etc. on the display or your mobile devices.

”” *Is B-TRONIC
really safe?* ““

B-TRONIC:

Safety you can trust!

- 1.** B-TRONIC is radio based and can be operated without an Internet connection.
- 2.** Becker has more than 15 years of experience in protecting and securing radio system.
- 3.** Internet connections are anonymized. The system remains completely self-contained.

” Which
functions
does the B-TRONIC
system offer? “

B-TRONIC offers you creative diversity:

- ✓ A self-explanatory main control unit (CentralControl)
 - ✓ Simple handling of the central control via integrated touch display (CC51) or external monitor (CC31)
 - ✓ Status messages about the position and switching status of KNX-RF products
 - ✓ Compatibility with KNX-RF products from other manufacturers
 - ✓ System operation via PC, tablet and smartphone
 - ✓ Internet radio availability and webcam integration via CentralControl
 - ✓ Intelligent repeater function (signal amplifier) in the roller shutter drives
 - ✓ Downward compatibility due to the support of KNX-RF and Centronic
 - ✓ Display of current weather data as a free service
 - ✓ Automated software updates via the Internet
 - ✓ Can be implemented in LAN and WLAN
- and many more ...

The CentralControl is the main operation and visualization unit of the B-TRONIC system. External control via a PC, tablet or smartphone is simple after integrating the CentralControl in a local network or the internet.

” How and where
can I purchase
B-TRONIC? “

Everything is easy with B-TRONIC. From the very start.

We want you to enjoy B-TRONIC from the first moment! Therefore, the system is only available from certified Becker specialists. This means you are guaranteed first class service from initial advice to final system configuration on-site.

Are you ready to experience a real taste of freedom?

The information on the following pages will help you discover independence ...
