Nice
Home Automation

A gesture is all you need to make the whole house move.

Gates, garage doors, awnings and rolling shutters are always under control with Nice, as irrigation and garden lighting.

Automation systems, which are easy to install and use, can be created for the entire house, without having to design and produce sophisticated and costly home systems:
Nice is the simplest system to create a coordinated automation system in any type of home, office, hotel and public building.

Choosing Nice means guaranteeing
- the utmost performance;
- the latest and most advanced technology;
- the most practical and innovative design.

Nice

Home Automation

A single system.
Or rather, many.

A Nice system for the management of automation systems, lights and irrigation offers the utmost living comfort. The NRC system avoids the costs and upheaval of building operations or the application of unsightly conduits to run control cables.

With Nice you can automate any kind of gate or garage door:
light or heavy, for residential or intensive use.
Nice has always the ideal solution for you: you won't get wet when it rains, and leave the car with the engine on in the middle of the road because you have to jump out to open or close the gate and garage; and you won't have to worry if you have left the gate open with the kids or dog around that can run into the road…
In short, many worries less…

A simple click for the management of awnings and rolling shutters:
the Nice automation system does it all alone, even when you are away, measuring the intensity of the sun and the strength of the wind, obeying all your orders at the times you set.
Simple and fast programming, easy installation and versatile options when upgrading automation systems in the case of restoration work or in new buildings, for perfect light control.

Nice offers simple and practical solutions, developed to improve your well-being at home, ideal both in new buildings and in all types of restoration work.

If the house, the office, the public building, or even the hotel have many automation systems, you can imagine how much time you could save by activating, together or in groups, each automation system of one or several buildings connected together, with the certainty that it is done as you intended.

Is jumping up in the air every morning and every evening to lift and lower the roller gates of the shop and getting your hands covered in grime your ideal pastime?
Installing a Nice automation system is simple, fast and increases your security.

There are many vehicle access control systems for apartment blocks and companies from the simplest to the most sophisticated. You choose who enters, and only on the days and at the times that you have set. Assured comfort and peace of mind.

NICE
WAY

Nice is versatile.

## 360° programming and management of automations in your home!

Set times and modes for activation of awnings and shutters, while leaving gates or garages open is now impossible.

Nice is here to reassure you, inside and outside the home.

Concealed
Nice presents its concealed control: the ultra-compact dimensions enable all products in the miniaturised Tag control range to be installed inside standard wall-mounted plates. The height of subtlety…

Control all the automation systems with the "Group" and "Multiple group"
At night or when no-one is at home, you may want to close all the awnings and lower all the shutters; by associating all the previously created groups it will be possible to activate all the automations from just one control device.
Combined, key or touch operated
Practical digital or lock type selectors, or proximity systems to enter and exit in total safety.

Automatic

With this timer each automation system can be set as you prefer, assigning the desired time and the usage modes, to be woken up by the early morning sun, protect your geraniums from the midday sun, or to open and close them all at a particular time.

Climatic

If the wind picks up or the sun is stronger than usual, Nice takes care of this too: simple sensors instantly detect the weather conditions and retract the awnings and lower the shutters even when you are out.

With just a click

Small, slim and coloured, ideal to carry in your pocket, bag or use as stylish key rings, or table-top or wall-mounted, for control of the entire home at your fingertips! These are the Nice radio control systems, the choice is yours!

NRC: freedom travels via radio.

The Nice range has a wealth
of solutions that use radio signals
to simplify the installation,
the programming and use
of each automation.

NICE
WAY

The Nice Radio Connection
is a comprehensive system:
from remote or wall mounted controls,
to weather sensors, to motors.
Nice's experience has allowed to develop
trustworthy products, with sophisticated
and innovative functions that have
no equal throughout the world.

Click!
NiceWay takes care
of your home

The NRC system (Nice Radio Connection), which avoids the costs and upheaval of building operations or the application of unsightly conduits to run control cables, make the installation of any automation in new constructions or already existing buildings simpler and more cost effective.
Installation simplicity.
Radio connection of the Planotime timer, Nice radio control devices and Volo S-Radio sensors is possible thanks to the receiver that is built into the motors.
The installer only has to worry about securing the motor and connecting the 2 power supply wires!

NiceWay: many solutions, just one gesture.

One of the NiceWay system innovations consists in the separation between the transmitters and supports. Eleven transmitter modules can be introduced into five different support models to create a flexible range of made-to-measure solutions.

The module
holder cover

The transmitter module

Wall or table shockproof holder

Table shockproof holder

Squared wall plate

Rectangular wall plate

Modular

The NiceWay system is based on a number of transmitter modules that can be placed in five different holder models to create a flexible range of made-to-measure solutions.
Although the modules, available from 1 to 80 groups or 240 channels, are very small in size, they are extremely easy to operate.

Flexible

Choosing between the different available wall or table holders, every automation within the house or garden can be operated in complete accord with the 433.92 MHz Nice Ergo, Plano, FloR and VeryVR systems, with which NiceWay is fully compatible.

Made-to-measure

To protect the electronic parts from dirt and damp, the rubber function buttons are incorporated in the actual body of the control modules. NiceWay can be used anywhere in the home, in the garage, the living room, the kitchen as well as the bathroom.

Professional

For a more professional and practical use, the system can be programmed by means of the handy Nice palmtops.

NiceWay
Transmitter modules

Very small (only 41x41x10 mm) and practical, the 240 channel module with display, which controls 80 groups and 70 multi-groups, is ideal for the management of sophisticated systems. All the awnings, roller shutters and gates, as well as the office, home and hotel irrigation and lighting systems in just 14 g and 16 cm²!

The 1, 3, 6 and 9-channel modules for the control of single automations, groups or multi-groups. Each is available in various versions that are specific to the Nice Screen or Nice Gate range, or hybrid that have been designed for group or individual control:

- awnings, roller shutters, roller gates;

- gates, industrial and garage doors, barrier gate operators;

- lighting and irrigation systems.

Modules to control step-by-step automation systems

WM001C
Single channel module to control 1 automation system

WM003C
Three channel module to control 3 step-by-step automation systems

WM009C
Nine channel module to control 9 Step-by-Step automation systems

Possibility of memorising radio controls in Mode I: ON - OFF Mode II: ON/OFF - HOLD TO RUN - TIMER1 - TIMER2
(for the Screen products MODO II programmation)

Hybrid module to control step-by-step and Open-Stop-Close automation systems

WM003C1G
Module to control 3 step-by-step and 1 Open-Stop-Close automation systems

Modules to control Open-Stop-Close automation systems

WM001G
Module to control 1 Open-Stop-Close automation system either individually or in multi-group mode

WM002G
Module to control 2 Open-Stop-Close automation systems either individually or in multi-group mode

WM003G
Module to control 3 Open-Stop-Close automation systems either individually or in multi-group mode

WM006G
Module to control 6 Open-Stop-Close automation systems either individually or in multi-group mode

WM004G
Module to control 4 Open-Stop-Close automation systems either individually or in multi-group mode and sun sensor activation command

Multi-channel display module

WM080G
Module to control 80 Open-Stop-Close automation systems either individually or in multi-group mode and sun sensor activation command

WM240C
Module to control 240 step-by-step automation systems either individually or in multi-group mode

Ondo

Portable,
wall mounted
and table-top
supports

Portable, from table to wall
Ondo is the versatile NiceWay
line support; the wall support
with its simple magnetic fixing
system, transforms Ondo from
a comfortable portable transmitter
to an inconspicuous wall plate.

Ondo, made in a shiny dirt-resistant
plastic, has a rubber lower section
to improve grip and prevent slipping
when used on surfaces.

The transmitter module can be
inserted so that Ondo can be used
both in width and in length to increase
the personalisation possibilities.

The wall support
with magnetic fixing

Stone

Portable
and table-top
supports

Fetching and practical
With Stone the radio control
device becomes even more
functional and catching.
In shock-proof rubber to completely
protect the transmitting module,
fully directional for greater reception,
Stone is available in neutral or bright
colours so as to perfectly blend
into modern or elegant homes.

Comfortable anywhere
Resistant to the most violent
of shocks and garden humidity,
Stone is always easy to find,
be it on the living room or office
coffee table, on the kitchen
worktop, in the bathroom
or on the side of the pool.

Go
Mini cover

Go Nice!
Snugly in the pocket!
Every NiceWay transmitter really becomes portable with the Go support: the maximum performance to manage up to 240 channels from anywhere and with the maximum compactness.

Made of shock-proof rubber, in different and exclusive colours, Go protects the module from the most severe of knocks.

Go can be hung anywhere and can also be used as a key-ring thanks to the tie that is included in the pack.

In shock-proof rubber, miniaturized (46x46x15 mm)

Opla
Wall supports

Inconspicuous, fetching and functional
Extremely slim - as is the plate itself - the transmitter inserted into the Opla wall plate permits to inconspicuously and fetchingly add additional control points without having to perform any building operations.

The NiceWay Opla wall plates are available in the square Opla-S version and the rectangular Opla-R version and in many different colours.

WS squared wall plate

Just 10 mm thick

WR rectangular wall plate

Tag
## Concealed radio control systems

The invisible touch
Nice presents its concealed control: the ultra-compact dimensions enable all products in the miniaturised Tag control range to be installed inside standard wall-mounted plates.
The height of subtlety…

The new Tag system
disappearing inside standard wall mounted plates and suitable to confined spaces, are ideal for restorations and upgrades of existing systems to control home automations, lighting points and all loads up to 450 W otherwise not directly accessible from cable controls.
All without the need to replace the existing system or involve building work!

TTX4
Recessed transmitter with mains power supply. Ideal for the control of automations not directly accessible from cable controls.

TT2N
Miniaturised control unit for control of a 230 Vac motor up to 450 W, with built-in radio receiver.

TT2L
Miniaturised control unit for control of lighting systems, with built-in radio receiver.

TT2D
Miniaturised control unit for control of lighting systems from multiple points, with built-in radio receiver and switch.

Nice: the right answer to any automation need!
